EDUCATION

JNANA VIKAS INSTITUTE OF TECHNOLOGY — July 2015 - July 2019
Bachelor Of Engineering In Mechanical Engineering — Bengaluru
CGPA: 7.1

EXPERIENCE

ITC INFOTECH | Senior Software Engineer — Bengaluru, Karnataka India | April 2025 – Present

- Working as a **Senior FrontEnd Developer** on the Premier Inn project, building scalable web applications using **React.js, Next.js, TypeScript, Tailwind CSS, and TanStack Query,** while designing modular, reusable components and contributing to **frontend architecture** .
- Integrating **GraphQL APIs using Apollo Client** , validating API workflows with **Postman,** implementing unit/integration testing using **JEST** to ensure application quality, reliability, and maintainability.
- **Leveraging Agentic AI platforms and AI-powered developer tools** for code generation, refactoring, debugging, testing, and documentation, while collaborating with cross-functional teams through **Jira and Agile/Scrum** practices for sprint planning and feature delivery.

COGNIZANT TECHNOLOGY SOLUTIONS | Software Engineer Bengaluru | 05/08/2022 – 21/03/2025

- Contributed to the **development and maintenance of scalable front-end architecture** using React.js, building reusable and maintainable UI components through component-based design.
- Applied **micro-frontend principles** to develop modular, independently deployable features, improving application scalability, maintainability, and development efficiency.
- **Improved application performance** through **code splitting, lazy loading, and continuous code refactoring** , contributing to faster load times and an optimised codebase.
- Collaborated with cross-functional teams to **diagnose and resolve application issues** , implement unit testing, and follow QA best practices to ensure application stability and reliability.

RETAIL INSIGHTS PVT LTD | Software Engineer — Bengaluru | 17/02/2021 – 29/07/2022

- Led development of **scalable, high-performance, responsive web applications and PWAs** using React.js, Next.js, JavaScript, TypeScript, SASS, Bootstrap, AntD, and Tailwind CSS, delivering pixel-perfect, mobile-first experiences with offline capabilities and faster load times.
- Integrated **RESTful and GraphQL** APIs with asynchronous data handling and implemented efficient state management using Redux and Context API, while **optimizing performance through code splitting, lazy loading, caching** , and React DevTools runtime profiling.
- **Led a cross-functional team** of four developers, managing sprint planning, task assignments, code reviews, and timelines, while contributing to and **maintaining a monolithic architecture** .

SKILLS

Programming Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS/LESS
Libraries/Frameworks	React.js, Next.js, Redux-Toolkit, Tailwind CSS, Bootstrap, TanStack, Context, Bootstrap, AntD, Axios, REST/Graph QL APIs, JEST, React Testing Library

Tools / Platforms	VS Code, Git, Github, GitLab, Azure, CI/CD, JWT, OAuth, Authentication, Authorization, Netlify, Postman, WCAG, Micro-Frontend, Frontend System Design, Google Analytics, Adobe Analytics, Jira, Agile Scrum, AI-Driven Development, GitHub Copilot, Generative AI Integration, Prompt Engineering, Open AI APIs, Codex, Claude AI, Google Gemini

PROJECTS / OPEN-SOURCE

PREMIER INN | Link

React.js, Next.js, Typescript, Jest, Tanstack query, Tailwind CSS, Graph QL

Premier Inn is a leading hospitality brand operating across the **UK, UAE, and Germany** , where I contribute to the development and optimisation of its customer-facing web platform, enhancing booking journeys and overall user experience.

- Built reusable UI components and scalable frontend features using **Next.js and TypeScript,** following established architecture and development practices.
- Integrated APIs and implemented **performance optimisation and unit testing** to improve application reliability, maintainability and user experience.
- **Leveraged Agentic AI platforms and AI-powered development tools,** including GitHub Copilot, Claude, and Google Gemini for code generation, refactoring, debugging, test creation, documentation and development workflow optimisation.

ALLIGNMENT HEALTHCARE

React JS, Typescript, REST Api Integration, SyncFusion, SCSS.

Alignment Health is a US-based healthcare company.

- Developed reusable **React.js components and dynamic forms** for use across the application.
- Improved performance through **code refactoring and optimisation,** ensuring faster load times and a maintainable codebase.
- Collaborated with backend teams and clients to gather requirements and implement application enhancements.

DESIGN CAFE DD/CD APP - (BY DESIGN CAFE)

Next.js, Typescript, Graph QL, Tailwind CSS, Github.

DesignCafe is a prominent Indian home-interior design company headquartered in Bengaluru.

- Contributed to the **Designer Dashboard,** a centralised platform for managing projects, clients, and design workflows.
- Built reusable **Next.js components and layouts** for a consistent user interface.
- Implemented **secure route authentication** using Next.js, GraphQL, and Apollo.
- Integrated **server-side APIs using Next.js and Node.js** for efficient data handling.

METRO CUSTOMER REFERRAL - (PWA)

React JS, JavaScript, Bootstrap, Axios, Gitlab, Git .

Progressive Web App built for metro wholesalers to track product sales.

- Developed a **PWA with offline access, fast load times, and native app-like experiences.**
- Configured **service workers and caching** for static assets and offline functionality.
- Tested PWA compliance and performance using **Lighthouse and Chrome DevTools.**

WILLIAM PENN (E-COMMERCE APP)

Next js, JavaScript, Redux, Tailwind CSS, REST Api's, Axios.

E-commerce platform for luxury stationery and writing products, supporting a seamless online shopping experience.

- Contributed to the initial project setup, implementing **authentication and authorisation** using next-session cookies and developing key modules including **Dashboard, Wishlist, Cart, PLP and PDP.**
- Built a custom **Axios instance with JWT and session-cookie support** using interceptors for automated token handling and error management.
- Participated in **code reviews and pull requests,** maintaining coding standards, code quality, and application reliability.
